

PocketTrae

Cross-device action hub for TRAE

⚠ THE PROBLEM

AI workflows stall when humans aren't at their desk.

Blocked

TRAE pauses waiting for human approval

Context Switch

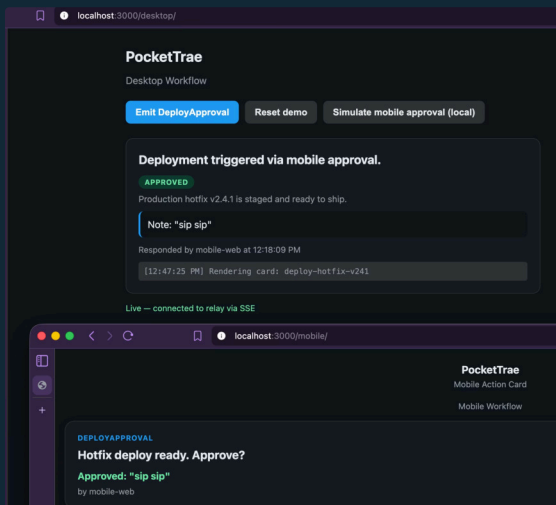

Operators must return to desktop to unblock

Delay

Every interruption costs time and momentum

Structured approval cards. Delivered to your phone.

TRAE Desktop

PocketTrae Mobile

PocketTrae bridges the gap between TRAE's desktop agent and the operator's mobile device — delivering rich, structured approval cards the moment a decision is needed.

Structured Cards

Full action context, not just a notification

Cross-Device

Desktop triggers, mobile approves

Instant Resume

TRAE continues the moment you tap

DEMO FLOW

Four taps. Zero context switching.

Desktop Action

TRAE agent reaches a decision gate

Card Delivered

Approval card pushed to mobile instantly

Tap Approve

One tap — full context visible on screen

Desktop Resumes

TRAE continues without missing a beat

✓ Approval round-trip in under 10 seconds — from anywhere.

PocketTrae keeps TRAE workflows moving.

0

Context Switches

No desktop required to approve

1

Tap to Unblock

Single action resumes the full pipeline

Built for operators, not spectators.

PocketTrae is a clean control plane for AI-assisted operations — giving teams the confidence to let TRAE run, knowing approvals are always one tap away.

- Less friction in approval loops
- Faster ops workflows end-to-end
- Smoother human-AI collaboration
